As the evidence begins to build, Humphrey realises who the killer is. Hypoactive amygdala responses to stimuli of others in distress are characteristic of children with the callous-unemotional trait and associated with aggressive behavior Lozier et al. We found that in many cases of rebuilding ties from comparably conflictual relations before prison that mothers were the more likely to keep visiting the young men, with other family members such as fathers, siblings and extended family either reducing contact, or sometimes cutting off ties altogether.
